oneChart

RADIOLOGY PACS MPAGES

mP – Radiology PACS

1. The **mP - Radiology PACS** feature allows providers to review diagnostic images and dictated reports performed in the Radiology Department.

2. MP - Radiology PACS may be accessed through the **Menu** within a patient's chart. mP - Radiology PACS

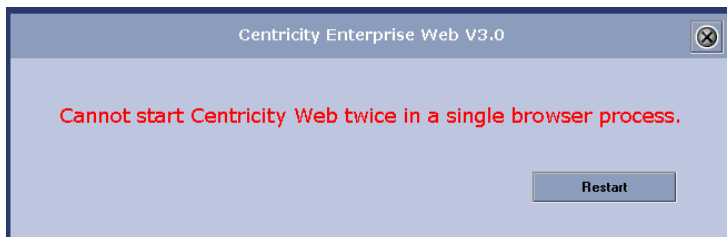

3. Click the **Binoculars** icon to filter and find results.

4. The **Disclaimer** advises providers **NOT** to use the Radiology PACS image views from mP - Radiology PACS to determine diagnostic interpretation.

5. The number of radiology images listed will display in parenthesis to the right of **Radiology Images**.

6. To filter by modality, select the appropriate option from the list located in **Filter Results**.

7. To set the number of results per page, click the **drop down arrow** in **Show entries.** The default setting is **10**.

8. The **Search** field may be used to filter results in any column.

9. Click the **Help** button to display callouts which contain information about certain functions.

10. **Column Headers**

    - **Order Type** – displays the order name

    - **Order Date/Time** – displays the date/time that the order was placed

    - **Completed Date/Time** – displays the date/time that the order was completed

    - **Report** – displays the status of the dictated report. Click the report status for the appropriate diagnostic test to view the report.

- **Image** – displays the appropriate modality icon for each diagnostic test listed. Click the icon to view the image at the bottom of the mPage.

- **Ordering Provider** – lists the provider who ordered the diagnostic test.

11. To view a PACS image, click the **Image** icon of the selected Radiology study.

12. The PACS image will display at the bottom of the screen. Click the **Open Current View in Browser** button to open a larger view of the image in another browser window.

NOTE: An error will occur if a provider attempts to view more than one image in a local browser. If the **Cannot start Centricity Web twice in a single browser process** message displays, close any open images prior to opening additional images or select the **Open Current View in Browser** button to view the image in Internet Explorer.

13. Click the **Show Patient Level PACS Results / Return to Exam Level PACS** buttons, to toggle between viewing a single image and viewing a list of available images in the image viewer window at the bottom.

14. To navigate through multiple pages of results, click **First**, **Previous**, the page number (**1, 2,...**), **Next**, or **Last**.

15. Click the **Back** or **Forward** icons to navigate between screens.

16. Click the **Home** icon to return to the mPage home page.

NOTE: This feature will **ONLY** work on Internet Explorer Versions 6-8 and Internet Explorer **MUST** be set as the default web browser. If an ActiveX component installation error message displays while attempting to access Radiology PACS images using a device outside of the Methodist system, login as an administrator and continue running add-ons until all ActiveX components have been installed and the Centricity Enterprise Web page displays.
