4. **PowerChart Changes** – Please read below for impacted facilities and roles
5. **Pharmacy Changes and Alerts** – Please read below for impacted facilities and roles.
6. **Reports / mPage** – Please read below for impacted facilities and roles.

1. Subject: Documentation Changes

ATTENTION: Effective Immediately

Facilities Impacted – All Facilities (Acute and Ambulatory)

Travel History / Ebola Screening Documentation – All physicians, All Physician Related Roles, and All Nursing Associates

The **Travel History / Ebola Screening** documentation has been added as required fields within multiple forms in the oneChart (Cerner) system. This affects ED, Le Bonheur Fast Track, Behavioral Health, Urgent Care, Acute, and Ambulatory forms. If a patient screens positive, the system will automatically order Contact and Droplet Isolation. The Ebola Screening / Travel History will be viewable on the ED Summary.

2. Subject: Order Changes and Alerts

October 7, 2014 Changes

Facilities Impacted – All Facilities

Physician Consult / Medication Management – Physicians, Nurses

When ordering a Behavioral Health Consult order, **Physician Consult/Medication Management** will be an additional option as a **Reason for Consult**.

Facilities Impacted – Le Bonheur

POC Testing (Albustix) – Nursing

A new POC order, **Albustix**, will be available to place.

Facilities Impacted – University ED only

ED Initial Sepsis Symptoms Lab Protocol CareSet – ED Physicians, ED Nurses

A new CareSet, **ED Initial Sepsis Symptoms Lab Protocol Orders**, will be available for use should a patient have a positive sepsis screen. The order for **Blood Culture for temp greater than 38.0C** is included in the CareSet.

October 14, 2014 Changes

Facilities Impacted – Le Bonheur ED

LEB ED Sepsis Plan – ED Physicians, ED Nurses

The **LEB ED Sepsis Plan** is now available to place.

3. Subject: eMar Changes

October 14, 2014 Changes

Facilities Impacted – All Facilities

Pharmacy Verify Warning in Procedural Areas – Physicians, Surgical and Procedural Nurses

The **Pharmacy Verify** warning will be removed for the above positions to avoid delay in the documentation of medications given in those areas.

Facilities Impacted – All Facilities

Nurse Review in Procedural Areas – IR, Radiation, Cath Lab, GI Lab and Treadmill Technicians

Technicians listed in the procedural areas above, will have the ability to perform the Nurse Review of orders for contrast administration.

4. Subject: PowerChart Toolbar Changes

Announcement

October 7, 2014 Changes

Facilities Impacted – All Facilities

PHI Icon – All Positions

The **PHI** icon, formerly used to create the Transition of Care document, will be removed.

5. Subject: Pharmacy Changes and Alerts

Effective Immediately

Facilities Impacted – All Facilities

DEA Re-Classification of HYDROcodone Medication – Physicians, Nursing, Pharmacy

As of **October 6, 2014**, the Drug Enforcement Agency (DEA) has re-classified all medications containing HYDROcodone as a C-II narcotic. Prescriptions entered in PowerChart will now have the following changes:

- Each prescription for C-II drugs will print on a **separate sheet of paper**.
- **Refills** will **not** be allowed.
- The **Earliest Fill Date** field will be available for use.

6. Subject: Reports / mPages

October 14, 2014 Changes

Facilities Impacted – All Facilities

Transfusion Services MPage Component– Physicians, Physician Related Roles, Nursing, Pharmacy, and Ambulatory Associates

The new Transfusion Services component will be added to the mPage Summary views, and will display below the Pathology component. The Transfusion Services component provides easy access to blood products and transfusion related information in a view only display.

Associates - For questions or concerns, please call the Help Desk at 516-0000.
