

ADD A DIAGNOSIS

PNED

When completing an **ED Provider Note**, a diagnosis must be documented.

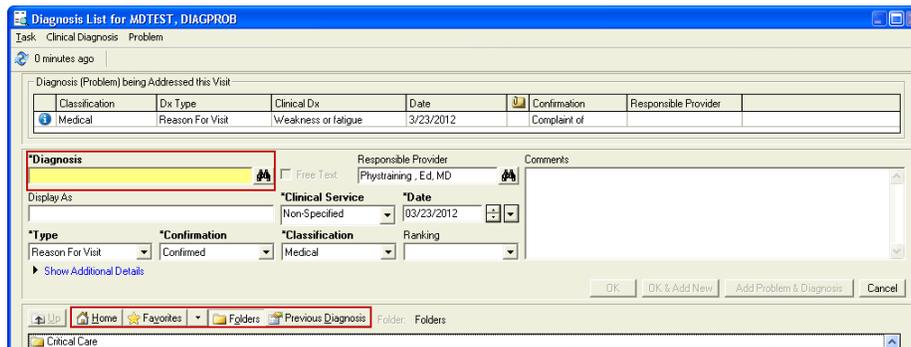

A diagnosis must be documented on any patient that is discharged from the ED **prior to midnight** of the same day or the diagnosis will not be saved to the system.

In the ED Provider Note, a diagnosis may be selected from the **Impression and Plan** paragraph in the **Diagnosis** sentence or the **Diagnosis code search** sentence.

To add a diagnosis from the **Diagnosis** sentence, select a diagnosis from the list of terms provided.

To add a diagnosis using the **Diagnosis Code Search** sentence:

1. Click **Diagnosis code search**.
2. The **Diagnosis List** window displays. Click **Add**.
3. A diagnosis may be added from the **Diagnosis** search field or from one of the tabs listed in the Diagnosis List window: **Home**, **Favorites**, **Folder** and **Previous Diagnosis**.

- a. To add a diagnosis using the Diagnosis search field, type the diagnosis in the **Diagnosis** field, click the **Binoculars**, select a diagnosis to highlight it and click **OK** in the **Diagnosis Search** window.
 - b. To add a diagnosis from a specific tab, click a folder within the appropriate tab and double-click the appropriate diagnosis.
4. After selecting a diagnosis, click **OK** to add the diagnosis, **OK & Add New** to add the diagnosis and add an additional diagnosis, **Add Problem & Diagnosis** to add the selected diagnosis as a problem and a diagnosis or **Cancel** to remove the diagnosis selection prior to adding it.

5. Highlight the diagnosis and click **Include** to add the diagnosis to the ED Provider Note.
