

On **September 1, 2009**, an alert will begin displaying that notifies the provider when opening a medical record on a patient that has expired. This alert will prevent documentation on a deceased patient and contact being made with families of deceased patients for missed appointments.

In addition, a column will be added to the Find Patient Search Window, which will indicate if the patient has expired.

For questions, contact the Help Desk at 516-0000. ##2.
