

Order Sets Change: April 6, 2009 Germantown, South and University

- **New methodistMD and MOLLI orderSet location:**
 - Select Protocols/Order Sets/CareTracks and **oneChart Order Sets** instead of Standardized Order Sets.
 - Ordersets can be printed as needed vs ordering from print shop.

- **New oneChart order sets content and format:**
 - Many current order sets have been replaced and updated with new content and format .(Note: OB, Transplant, Oncology have no change at this time)
 - Previously, on some of the order sets, there were both orders and a place for physician documentation. The new order sets will contain only orders. Physicians will need to use the yellow order/progress note sheets for their documentation or oneChart clinical note. (Contact physician education line for training if needed)
 - Unit Secretaries and/or nurses will be able to enter order sets completed by the physician directly into oneChart, **except for medications**, which they will continue to fax to pharmacy.
 - Methodist physicians are encouraged, but not required, to use the new oneChart order sets.

For additional information or training, call the physician education line at 516-0369 or contact the physician analyst at your facility.
