SPECIALTY OF FAMILY MEDICINE
Delineation of Clinical Privileges

Criteria for granting privileges: Current board certification in Family Medicine by the American Board of Family Medicine or the American Osteopathic Board of Family Physicians.
Or
Successful completion of an accredited ACGME or AOA accredited post-graduate training program in Family Medicine and board certification within 5 years of program completion.

Applicants will be requested to provide documentation of practice and current clinical competence as defined on the attached competency grid. Applicants have the burden of producing information deemed adequate by the hospital for a proper evaluation of current clinical competence, and other qualifications and for resolving any doubts.

If the applicant's documentation does not meet the age-specific requirements, the applicant may request to be proctored, and apply for privileges after successful completion of proctoring. At the discretion of the Department Chair, the Pediatric Medical Staff may supervise the management of any Family Medicine Pediatric admission.

Current Clinical Competence - MLH

In addition to the required education, experience and/or training specified on each DOP (Delineation of Privilege) form, documentation of current clinical competence is required. Current clinical competence is described as having "performed the privilege recently and performed it well".

Current clinical competence is assessed prior to granting privileges initially and is reassessed when renewing privileges at reappointment – for maintenance of privileges. Current Clinical Competence (CCC) may be location specific (acute hospital care/surgery center (ASC) and/or age specific (adult, pediatric, neonatal).

This should not be confused with Focused Professional Practice Evaluation (FPPE)

- FPPE: an evaluation of clinical competence of all new privileges as performed at the specific licensed MLH facility (MHMH, MHOBH) for which they have been initially granted. This applies to privileges for all new applicants as well as to new/additional privileges for current members.

Both FPPE and current clinical competence assessments are privilege-specific. FPPE is conducted during the period after granting new/additional privileges. FPPE must occur at the MLH facility(ies) where privileges/membership are held. Current clinical competence may be evaluated from case logs provided by non-MLH facilities.

Current Clinical Competence: Requirements for New Applicants

- If applying directly from training, or based on the training received in a formal training program, provider should submit case* logs from the program authenticated by the program director along with their recommendation attesting to the comparable training, experience and qualifications relative to the criteria for the clinical privileges requested.

- If applying more than 1 year after training completion, submit the following:
o Aggregate data from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 diagnosis codes and the number of patients per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.

o Procedure list from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 CPT/ICD codes and the number of procedures per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.

o Case logs (see specifications below) for any special privileges requested that meet the criteria specific for the number of procedures defined for current clinical competence.

Current Clinical Competence: Maintenance of Privileges for Current Members

- **For active staff members:** MLH source data will be aggregated to review cases and procedures performed. If this does not meet the minimum requirement for core and/or special privileges, the practitioner will be required to submit additional case logs from other facilities.

- **For courtesy staff members with low activity and for certain active staff with activity that has diminished and is now low:** Department chair recommendation should be obtained from their primary facility; and the practitioner should submit the following:
  
  o Aggregate data from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 diagnosis codes and the number of patients per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.

  o Procedure list from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 CPT/ICD codes and the number of procedures per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.

  o Case logs (see specifications below) for any special privileges requested that meet the specific number of procedures defined for current clinical competence.

Case Logs

All required case logs and/or procedure lists must contain the following information at a minimum: Date, patient identifier, CPT/ICD procedure code, diagnosis, complications, and disposition, and the facility name, name/title of the person authenticating the log, signature, date signed, and contact information. If the information requested is not available, please provide an explanation.

*A “case” is defined as an episode of care – either cognitive or procedural. For interpretive care, “case” is interpretation of one diagnostic study.*

Ongoing Professional Performance Evaluation (OPPE)

OPPE is evaluated periodically (more frequently than annually) in the facility where membership/privileges are held.

To assure OPPE requirements are satisfied, the practitioner must periodically exercise the privileges in the MLH facility(ies) where he/she has membership. OPPE must occur regularly on patient encounters in the MLH facility(ies) where privileges/membership are held.

| **Family Practice Obstetrical C-section Core**   | **Documentation of a minimum of one year training in a Family Medicine obstetrical/gynecological training program** | **Case logs from training program documenting a minimum of 50 c-sections as primary operator**  
**Case log documenting the performance of deliveries and obstetrical procedures including at least 20 c-sections cases per year within the previous 24 months**  
**Procedure list identifying the top 10 CPT/ICD codes for your practice within the previous 12 months and the number of procedures performed from facility(ies) at which procedures were performed** | **First 5 cases** | **Case log documenting the performance of at least 20 c-section cases per year as primary operator within the previous 24 months** |
| Obstetrical dilatation and Curettage in the 1st trimester | Must maintain Family Medicine Obstetrical/C-Section core privileges. | Case logs documenting a minimum of 20 cases as primary operator | First 5 cases | Case logs documenting a minimum of 20 cases as primary operator within the previous 24 months |
| Postpartum sterilization mini-lap                | Must maintain Family Medicine Obstetrical/C-Section core privileges. | Case logs documenting a minimum of 20 cases as primary operator | First 5 cases | Case logs documenting a minimum of 20 cases as primary operator within the previous 24 months |
Family Medicine Core Privilege: Admit, evaluate, diagnose, and treat patients at or above the age of 13 for common illnesses and injuries including disorders common to old age.

Access, stabilize and determine disposition of patients with emergency conditions consistent with the Medical Staff policy regarding emergency or consultative services.

Privileges include but are not limited to:

- suture uncomplicated lacerations
- I&D abscess
- lumbar puncture
- perform simple skin biopsy or excision
- removal of non-penetrating corneal foreign body
- management uncomplicated minor closed fractures and dislocations
- gynecologic care for female patients (low-risk, non-operative)
- pre-operative and postoperative medical care for surgical patients

*Family Medicine Core privileges do not include attending on patients in the Methodist University Critical Care Units, Olive Branch Hospital ICU, or any OR.*

Family Medicine Pediatric Core Privilege: Admit, evaluate, diagnose and treat pediatric patients up to the age of 18, without major complications or serious life-threatening diseases and conditions, i.e. those encompassed by the specialty of Family Medicine, which constitutes skills achieved during residency training.

Access, stabilize and determine disposition of patients with emergency conditions consistent with the Medical Staff policy regarding emergency or consultative services.

Consultation with appropriate pediatric specialist or sub-specialist should be obtained when complications develop during hospitalization and/or when there is unexpected prolonged length of stay >5 days.

Privileges include but are not limited to:

- suture of uncomplicated lacerations
- I&D abscess
- lumbar puncture
- simple skin biopsy or excision
- removal of non-penetrating corneal foreign body
- management of uncomplicated minor closed fractures and dislocations
- gynecologic care for female patients (low-risk, non-operative)
- venipuncture, newborn care, with appropriate consults for neonatal intensive care and newborn circumcision.

*Family Medicine Pediatric Core privileges do not include attending on patients in the Methodist University Critical Care Units, Le Bonheur Children’s Critical Care Units, Olive Branch Hospital ICU, or any OR.*
Family Medicine Obstetrical/C-Section Core Privilege:

The practitioner may take care of routine ante-partum patients. Access, stabilize and determine disposition of patients with emergency conditions consistent with the Medical Staff policy regarding emergency or consultative services.

The practitioner should be able to perform the following:

- Antepartum and postpartum care
- Normal vertex spontaneous vaginal delivery of the term (37-42 weeks)
- Manual rotation of the vertex from the transverse position
- Outlet forceps (vacuum extraction included)
- Repair of perineal, vaginal or cervical lacerations as well as episiotomies
- Use of oxytocin for augmentation of labor
- Placement of intrauterine scalp electrodes
- Intrauterine pressure catheters
- Amniotomy
- Local and pudendal anesthesia
- Circumcisions
- C-section with or without non-laparoscopic tubal ligation

Consultation with an obstetrician is mandatory when a patient becomes no longer low risk. Some of the conditions that mandate an OB Consultation are listed below. The criteria listed do not represent a complete list. It is therefore recommended that obstetrical consultation be requested (physician to physician) and documented within the medical record when the status of either the mother or fetus is in doubt. Criteria/conditions identified are:

- known or suspected coagulopathy
- HELLP syndrome
- hypertension; both chronic pre-gestational and pregnancy induced
- insulin dependent diabetes; both pre-gestational and gestational
- labor disorders not responding to active management
- malpresentations – breech, shoulder, face
- medical illness of pregnancy including (but not limited to) hyperthyroidism, adrenal disease, myasthenia gravis, cardiac disease, pulmonary disease, connective tissue disease, renal insufficiency, ulcerative colitis
- morbid obesity
- multiple gestation
- oligohydramnios, polyhydramnios
- suspected placenta previa
- postpartum hemorrhage from suspected retained placenta/products
- pre-eclampsia, eclampsia
- pre-term labor and delivery (less than 34 weeks)
- premature rupture of membranes
- suspected sepsis, chorioamnionitis
- third trimester bleeding of undetermined etiology
- trophoblastic disease (molar pregnancy, choriocarcinoma, etc.)
- suspected uterine rupture

Special: The physician requesting special privileges must meet the minimum criteria for the specialty core and demonstrate the appropriate post graduate training and/or demonstrate successful completion of an approved, recognized course when such exists, or other acceptable experience.

Administration of moderate sedation: See Credentialing Policy for Sedation and Analgesia by Non-Anesthesiologists. Requires: Separate DOP, ACLS, NRP or PALS certification
Family Medicine Clinical Privileges

Check below the particular privileges desired in Family Medicine for each facility:

Please check (✓) applicable age categories for each privilege requested.

Limitations

Clinical privileges are granted only to the extent privileges are available at each facility.

Darksly shaded areas represent privileges not available to any practitioner due to the privilege not being offered by the facility.

I have requested only those privileges for which by education, training, current experience and demonstrated performance I am qualified to perform and for which I wish to exercise at the facilities indicated above, to the extent services are available at each facility, and I understand that:
(a) in exercising any clinical privileges granted, I am constrained by facility and medical staff policies and rules applicable generally and any applicable to the particular situation

(b) any restriction on the clinical privileges granted to me is waived in an emergency situation and in such situation my actions are governed by the applicable section of the medical staff bylaws or related documents
