### Admission/Transfer/Discharge

- **Admit Patient**: to Dr. ________________________________________
- **Admit Status**: [ ] Inpatient [ ] Routine Post Procedure <24hrs [ ] 23 hour OBS
- **NOTE to MD**: Admit as Inpatient: POST PCI (PTCA) care to cardiac monitored bed (Medicare requirement);
  - severity of signs and symptoms, adverse medical event, patient does not respond to treatment.
- **Post Procedure**: routine recovery < 8 hours same day stay; extended recovery 8 -24 hours
  - expected overnight stay, complexity of procedure or pt. condition, i.e., laparoscopy, HNP.
- **23 Hour Observation**: additional time needed to evaluate for inpatient admission, i.e. r/o MI, syncope,
  - abdominal pain; patient will respond rapidly to treatment, i.e. dehydration.

- **Bed Type**: [ ] Med/Surg [ ] Critical Care [ ] Stepdown [ ] Telemetry; Specific Unit Location: ___________
- **Notify physician once T;N, of room number on arrival to unit**

### Primary Diagnosis:

---

### Vital Signs

[X] Vital Signs
- T;N, Routine Monitor and Record T,P,R,BP, per Blood Transfusion policy

### Activity

---

### Food/Nutrition

---

### Patient Care

- [ ] Intermittent Needle Therapy
  - Insert/Site (INT Insert/Site Care)
  - T;N, q4day
- [ ] Implanted Port Access (PortACath
  - T;N Access)
- [ ] Transfuse (give) Blood Nsg
  - T;N
- [X] Intake and Output
  - T;N
- [X] Consent Signed For
  - T;N, Procedure: Transfusion of Blood/Blood Products

### Respiratory Care

---

### Continuous Infusions

- [ ] Sodium Chloride 0.9%
  - 250 mL, IV, Routine, 75 mL/hr

### Medications

- [X] acetaminophen
  - 650 mg, Tab, PO, once, Routine, give prior to blood/blood product transfusion
- [X] diphenhydrAMINE
  - 25 mg, Cap, PO, once, Routine, give prior to blood/blood product transfusion
- [ ] diphenhydrAMINE
  - 25 mg, Injection, IV Push, once, Routine, give prior to blood/blood product transfusion
- [ ] furosemide
  - 40 mg, Injection, IV Push, once, PRN Other, specify in Comment, Routine,
  - Comment: PRN give after each unit PRBCs
- [ ] methylPREDNISolone
  - 40 mg, Injection, IV Push, once, Routine, give before blood/blood product transfusion

### Laboratory

- [ ] Type and Crossmatch PRBC
  - Routine, T;N, Reason: transfuse, 2 units, Type: Blood
- [ ] Type and Crossmatch PRBC
  - Routine, T;N, Reason: transfuse, 2 units, Type: Blood, Comment: leuko reduced
- [ ] Type and Crossmatch PRBC
  - Routine, T;N, 2 units, Type: Blood, Comment: leuko reduced and irradiated
- [ ] Crossmatch Units from Type and Screen
  - Routine, T;N, Reason: transfuse, 2 units
