

**SPECIALTY OF EMERGENCY DEPARTMENT NURSE PRACTITIONER
(Pediatric Hospital Facilities)
Delineation of Clinical Privileges**

- Criteria for granting privileges:**
- Current national board certification in the appropriate advanced practice nursing specialty
 - And**
 - Current unencumbered license to practice as a Registered Nurse and as a Nurse Practitioner (APN) in the state(s) of his/her practice.
 - And**
 - Education in the appropriate specialty at the masters or doctoral level
 - And**
 - Current Drug Enforcement Agency (DEA) number and registration in the state(s) of his/her practice, as applicable.
 - And**
 - Current unencumbered Tennessee Nurse Practitioners (APN) Certificate with prescriptive authority
 - And**
 - Current PALS certification

Applicants will be requested to provide documentation of practice and current clinical competence as defined on the attached competency grid. Applicants have the burden of producing information deemed adequate by the hospital for a proper evaluation of current clinical competence, and other qualifications and for resolving any doubts.

Current Clinical Competence - MLH

In addition to the required education, experience and/or training specified on each DOP (Delineation of Privilege) form, documentation of current clinical competence is required. Current clinical competence is described as having “performed the privilege recently and performed it well”.

Current clinical competence is assessed prior to granting privileges initially and is reassessed when renewing privileges at reappointment – for maintenance of privileges. Current Clinical Competence (CCC) may be location specific and/or age specific (adult, pediatric, neonatal).

This should not be confused with Focused Professional Practice Evaluation (FPPE)

- FPPE: an evaluation of clinical competence of all new privileges as performed at the specific licensed MLH facility (MHMH, MHOBH) for which they have been initially granted. This applies to privileges for all new applicants as well as to new/additional privileges for current members.

Both FPPE and current clinical competence assessments are privilege-specific. FPPE is conducted during the period after granting new/additional privileges. FPPE must occur at the MLH facility(ies) where privileges/membership are held. Current clinical competence may be evaluated from case logs provided by non-MLH facilities.

Current Clinical Competence: Requirements for New Applicants

- If applying directly from training, or based on the training received in a formal training program, provider should submit case* logs from the program authenticated by the program director along with their recommendation attesting to the comparable training, experience and qualifications relative to the criteria for the clinical privileges requested.

- If applying more than 1 year after training completion, submit the following:
 - Aggregate data from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 diagnosis codes and the number of patients per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.
 - Procedure list from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 CPT/ICD codes and the number of procedures per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.
 - Case logs (see specifications below) for any special privileges requested that meet the criteria specific for the number of procedures defined for current clinical competence.

Current Clinical Competence: Maintenance of Privileges for Current Practitioners

- Practitioner should submit the following:
 - Aggregate data from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 diagnosis codes and the number of patients per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.
 - Procedure list from acute care or surgery center facility for the previous 12 month time period, identifying the top 10 CPT/ICD codes and the number of procedures per code. Any complications/poor outcomes should be delineated and accompanied by an explanation.
 - Case logs (see specifications below) for any special privileges requested that meet the specific number of procedures defined for current clinical competence.

Case Logs

All required case logs and/or procedure lists must contain the following information at a minimum: Date, patient identifier, CPT/ICD procedure code, diagnosis, complications, and disposition, and the facility name, name/title of the person authenticating the log, signature, date signed, and contact information. If the information requested is not available, please provide an explanation.

*A “case” is defined as an episode of care – either cognitive or procedural. For interpretive care, “case” is interpretation of one diagnostic study.

Ongoing Professional Performance Evaluation (OPPE)

OPPE is evaluated periodically (more frequently than annually) in the facility where membership/privileges are held.

To assure OPPE requirements are satisfied, the practitioner must periodically exercise the privileges in the MLH facility(ies) where he/she has membership. OPPE must occur regularly on patient encounters in the MLH facility(ies) where privileges/membership are held.

Specialty/Procedure Delineation of Privilege Form	Education/Training Documentation for Initial Granting	Initial Application (Proof of current clinical competence)	FPPE – Validation of competence after appointment and/or granting of a new or additional privilege (To be completed within one year)	Maintenance Requirements

Scope of Service and Responsibility:

Scope of service is based upon education, clinical training, demonstrated skills and capacity to manage procedurally related complications. The Nurse Practitioner will collaborate with the supervising physician in admitting, managing care, and discharging patients from the hospital.

The Nurse Practitioner shall be in compliance with all applicable state and hospital rules including, but not limited to, supervision, protocols, patient reviews, and prescriptions.

Clinical Supervision Requirements:

The supervision of the Nurse Practitioner will be compliant with all applicable state rules and regulations and specifically as outlined in Rules of Tennessee Board of Medical Examiners Division of Health Related Boards Chapter 0880-6 and Rules of Tennessee Board of Nursing Chapter 1000-4.

Core Nurse Practitioner Privilege:

The privileges shall be for all pediatric emergency patients from 0-18 years of age seen at the pediatric hospital facilities on an outpatient basis. Consistent with the intent of the state rules and regulations, privileges serve the purpose to maximize the collaborative practice of Nurse Practitioners and supervising physicians in a manner consistent with quality health care delivery. Therefore, written protocols developed jointly by the supervising physician and the Nurse Practitioner will guide the ongoing medical management of patients and the following privileges.

1. Perform and document initial and subsequent history and physicals. Once every ten (10) business days the supervising physician shall make a personal review of the historical and therapeutic data and shall so certify by signature.
2. Develop working assessments and order necessary diagnostic studies.
3. Draw diagnostic conclusion.
4. Plan and prescribe treatment according to approved protocols, e.g. comfort measures, restorative care, further testing, follow-up care, and patient education/counseling.
5. Record and document assessments, orders, diagnostic conclusions, and treatment plans on the medical record.
6. The Nurse Practitioner may write prescriptions, and any prescription written and signed by the Nurse Practitioner under the supervision and control of a supervising physician shall be deemed to be that of the Nurse Practitioner. Controlled substances may be prescribed consistent with state rules and regulations.
7. Collaborate with supervising physician and other health care providers to provide patient care.
8. May prepare a discharge summary, including final diagnosis and procedures, and incorporate the physical findings, laboratory reports, and the patient's course in the hospital. In addition the summary will indicate the instructions given the patient in reference to diet, medication, physical activity, and follow-up care. The discharging physician will certify the completed medical record.

Core Procedures:

- a. Approved LeBonheur Emergency Department Treatment Protocols
- b. Anesthesia – topical/local
- c. Arterial Puncture for Laboratory specimen
- d. Debridement of first and second degree burns
- e. Epistaxis , nasal packing
- f. Hernia Reduction – umbilical and inguinal
- g. Interosseous placement
- h. Lumbar Puncture

- i. MIC/GT tube replacement
- j. Nail removal
- k. Reduction of Rectal prolapse
- l. Splinting of Extremities
- m. Subungal hematoma evacuation
- n. Suprapubic tap
- o. Tooth reimplantation

Process Protocol:

The Nurse Practitioner in collaboration with the supervising physicians identifies the following evidence-based resources, texts, and reference documents that are applicable standards of care and provide the applicable process protocols for care management:

- Pediatric Emergency Department Patient Care Protocols
- Griffith's 5 Minute Pediatric Consult; Schwartz
- Textbook of Pediatric Emergency Medicine; Fleisher and Ludwig
- Pediatric Primary Care for Nurse Practitioners; Burns, Dunn et al
- Clinical Guidelines in Child Health; Uphold & Graham
- The Harriet Lane Handbook of The Johns Hopkins Hospital published by Mosby

Consultation:

The Nurse Practitioner will be managing Primary, Secondary, and Tertiary care conditions for the above described patient population. In general, communication with a physician will be sought for all of the following situations and any others deemed appropriate:

- Whenever situations arise which go beyond the intent of the Protocols or the competence, scope of practice or experience of the Nurse Practitioner
- Whenever patient conditions fail to respond to the management plan in an appropriate time.
- Any rare or unstable patient conditions.
- Any patient conditions which do not fit the commonly accepted diagnostic patterns for a disease or disorder.

- Any unexplained physical examination or historical finding.
- At the request of the patient, the Nurse Practitioner or the physician.
- All emergency situations after initial stabilizing care has been started.

Whenever a physician is consulted, a notation to that effect, including the physician's name, must be made in the medical record.

Special Procedures:

The applicant must provide documentation of current clinical competence in performing the procedure consistent with the criteria set forth in medical staff policies governing the exercise of specific privileges and the appended competency grid. Applicants have the burden of producing information deemed adequate by the hospital for a proper evaluation of current clinical competence, and other qualifications and for resolving any doubts.

Nurse Practitioner – Pediatric Emergency Department Clinical Privileges

Check below the particular privileges desired as Nurse Practitioner for each facility:

Please check (✓) applicable age categories for each privilege requested.

Privilege Description	Methodist Healthcare – Memphis Hospitals (MHMH) Germantown, Le Bonheur Medical Center, North, South & University, Outpatient Clinics & Diagnostic Facilities				Methodist Healthcare – Olive Branch Hospital (MHOBH)
	Neonates (0-28 days)	Infants (29 days– 2 Years)	Children & Adolescents (2-18 years)	Adults & Adolescents (13 & Above)	All Ages
Nurse Practitioner Pediatric Emergency Department Core					
Specialty Focus: condition(s), disease(s) for the patient population (e.g. pediatric neurology, adult cardiology)			Emergency Medicine, Pediatric Hospital Facilities		
Limitations	Clinical privileges are granted only to the extent privileges are available at each facility.				
Darkly shaded areas represent privileges not available to any practitioner due to the privilege not being offered by the facility.					

Acknowledgement of practitioner

I have requested only those privileges for which by education, training, current experience and demonstrated performance I am qualified to perform and for which I wish to exercise at the facilities indicated above, to the extent services are available at each facility, and I understand that:

- (a) in exercising any clinical privileges granted, I am constrained by facility and medical staff policies and rules applicable generally and any applicable to the particular situation
- (b) any restriction on the clinical privileges granted to me is waived in an emergency situation and in such situation my actions are governed by the applicable section of the medical staff bylaws or related documents
