

Anesthesia

Change Name	Change Impact Description	Impacted Stakeholder Groups	Degree	Perception	👤	⚙️	💻
Narcotic Waste	Today, waste is documented and co-signed in Omnicell. Pharmacy is responsible for reviewing and processing any narcotic waste discrepancies and then they contact Anesthesia Providers to correct charting discrepancies. In a future state, Pharmacists will document discrepancies in Data Collection Notes with information about narcotic waste reconciliation workflow for Anesthesia.	• Anesthesia Providers	●	😐		✓	
Blood Administration	Today, Anesthesia Providers sign off once for blood. In the future state, the dual sign-off process in Epic will require the administering anesthesiologist to first enter their password, followed by a second user who can input their credentials.	• Anesthesia Providers	●	😐		✓	
MTP Protocol	In future state, orders will be placed in Epic. Anesthesia Providers will initiate MTP with an order. OR nurses may also place the initiation order if Anesthesia is unable to.	• Anesthesia Providers	●	😐		✓	
Haiku 	There are no mobile applications in the current state. In future state, Haiku will be enabled to have reminders. Haiku/Canto enable Anesthesia Providers to complete basic documentation and review patient information while on the go around the hospital.	• Anesthesia Providers	●	😐			✓
