Grant Funded Programs	A variety of efforts are used current state to capture requirements for grant-funded initiatives to submit data to the funder. Some examples would be reports out of their third-party Care Management system, Penelope, or excel spreadsheet tracking. There are some teams that are still on paper. In future state, end users will use Compass Rose programs to track patient participation in all grant-funded programs. These programs will have capability to capture discrete data that can then be reported to their funders based on identified needs in the WG reviews of program configuration.	<ul style="list-style-type: none"><li>• Providers</li><li>• Compass Rose Users</li></ul>	●		✓
