Maximum Surgical Blood Order Schedule	Currently, they order blood ad hoc. In future state, tasks will automatically add orders for 2, 4, or 15 units of blood to the Procedure Pass. The orders are based on the procedure groupers, which estimate blood loss and transfusion amounts needed. Lab technicians can view status boards showing blood needs for the current day and the following week, which helps them manage their work better.	<ul style="list-style-type: none"> • Surgeon • Operation Room Staff 	●	😐		✓	
Auto-post logs	Currently, the time-based charges automatically, pick list charges must be posted manually. In future state, surgical logs with complete documentation will post automatically in nightly batch.	<ul style="list-style-type: none"> • Nurse • Primary Change • OR Change Poster 	●	😊		✓	
Surgical Log Pick List Posting	In current state, the pick list is manually charge. In future state, pick list charges will auto post.	<ul style="list-style-type: none"> • Nurse • Perioperative • OR Change Poster 	●	😊		✓

E-Consent	Currently, consents are collected on paper. In future state, surgical consent will be collected electronically. E-consents can be utilized to ensure better accuracy of consent forms, reduce scanning needs, and track procedure preparation. If pre-op consent will be electronically documented in Epic, gather the existing documentation.	<ul style="list-style-type: none"> • Nurse • Perioperative • Surgeons 	●	😐		✓	
	Today, Patients are identified in clinic by a procedure request. In future state, surgical consent will be collected electronically. E-consents can be utilized to ensure better accuracy of consent forms, reduce scanning needs, and track procedure preparation. If pre-op consent will be electronically documented in Epic, gather the existing documentation.	<ul style="list-style-type: none"> • Nurse • Perioperative • Surgeons 	●	😐		✓	
Specimen Requisition	Currently, they used the Legacy system for facilities print requisitions to accompany specimens to lab with the exception of CSF, cultures and blood draws/ lab. In future state, each facility will have the option to print or not print requisitions. If a specimen requisition is not required to accompany specimens to the lab, the print requisition button can be removed.	<ul style="list-style-type: none"> • Nurse • Perioperative 	●	😐		✓
