

Discuss What You Write. Write What You Discuss.

Beginning **March 30, 2021**, Methodist Le Bonheur Healthcare will implement the U.S. Department of Health and Human Services mandated **21st Century Cures Act**. This requires we share more of the medical record with our patients.

What documents can your patients see?

This mandate applies to all encounter types and includes ALL notes except Psychotherapy notes.

What does this change mean to me and my patients?

Patients will be able to see the clinical documentation you write on the MLH Patient Portal. It is important to know that MLH is already doing much of what is mandated. Remember, sharing information leads to better care.

For more information about the **21st Century Cures Act**, and MLH's implementation, go to **MOLLI**.
