

---

**General Information**

All applicants must meet the qualifications, conditions and responsibilities as set forth in MLH Credentials Policies. Policies are located on [www.methodistmd.org](http://www.methodistmd.org)

Applicants seeking appointment, reappointment, and/or clinical privileges have the burden of producing information deemed adequate by the Hospital for a proper evaluation of current clinical competence, character, ethics, and other qualifications and for resolving any doubts about an individual's qualifications.

Other requirements:

- Applicants will be requested to provide documentation of practice and current clinical competence as defined on the attached competency grid for initial granting and reappointment of privileges.
- This document is focused on defining qualifications related to competency to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirements that the organization is obligated to meet.
- Privileges granted may be exercised only at the Hospitals that offer the service/specialty, have sufficient space, equipment, staffing, and other resources required to support the privilege.
- Requests for clinical privileges that are subject to an exclusive contract will not be processed except as consistent with the contract.

---

**Evaluating Current Clinical Competence at time of Reappointment:**

MLH Data will be obtained and analyzed as available from EMR reporting systems or Health Information Management.

If minimal activity/low volume, then the applicant should supply case logs from other facilities' HIM department or practice billing systems to meet the minimum requirement(s) to be considered for the privilege. Source of the logs must be denoted.

The preferable format for external case logs is Excel or PDF from the sourced system. Handwritten case logs are generally not accepted.

Case logs should include a blinded or partial patient number for case distinction, date of service, type of service (inpatient or outpatient), location of service, diagnostic code and/or procedure codes, and performing provider where applicable.

**Core Privileges****Core Clinical Psychology in Provider-based Clinic**

Clinical privileges allow the individual to function subject to any licensure requirements and/or legal limitations, and to provide diagnosis, evaluation, treatment, and consultation for patients who suffer mental, behavioral, or emotional disorders, consistent with the legal definitions of the practice of psychological examination. Practitioner shall exercise judgment within the areas of practitioner's professional competence and to participate directly in the psychological treatment at the request of a member of the Medical Staff who has responsibility for the patient's overall medical care. The practitioner may not admit patients to the facility. The practitioner shall not function outside those privileges granted. Inherent in core privileges are the following areas/procedures:

- Provision of individual therapy
- Provision of group therapy
- Psychological assessment, including mental status examinations
- Psychological consultation and treatment planning
- Provision of adaptational behavior alteration techniques, including biofeedback and hypnotherapy, and other specific techniques within the limits of training and experience
- Write progress notes within the scope of their license and assigned treatment responsibility

**Core Neuropsychology in a Provider-based Clinic**

Clinical privileges allow the individual to function subject to any licensure requirements and/or legal limitations, and to provide diagnosis, evaluation, treatment, and consultation for patients with neurological, medical, neurodevelopmental and psychiatric conditions, and other cognitive, and learning disorders, consistent with the legal definitions of the practice of psychological examination. Practitioner shall exercise judgment within the areas of practitioner's professional competence and to participate directly in the psychological treatment at the request of a member of the Medical Staff who has responsibility for the patient's overall medical care. The practitioner may not admit patients to the facility. The practitioner shall not function outside those privileges granted. Inherent in core privileges are the following areas/procedures:

- Neuropsychology assessment, including specialized techniques and examinations
- Neuropsychology intervention techniques
- Assessment of neurocognitive functions for formulation of rehabilitation and management strategies for patients with neurological disorders
- Neurocognitive monitoring of recovery or progression of CNS disorders
- Consultation and treatment planning
- Write progress notes within the scope of their license and assigned treatment responsibility

**Psychology in Provider Based Clinic Privileges**

**Check below the privileges desired in Psychology for each facility:**
