
General Information

All applicants must meet the qualifications, conditions and responsibilities as set forth in MLH Credentials Policies. Policies are located on www.methodistmd.org

Applicants seeking appointment, reappointment, and/or clinical privileges have the burden of producing information deemed adequate by the Hospital for a proper evaluation of current clinical competence, character, ethics, and other qualifications and for resolving any doubts about an individual's qualifications.

Other requirements:

- Applicants will be requested to provide documentation of practice and current clinical competence as defined on the attached competency grid for initial granting and reappointment of privileges.
- This document is focused on defining qualifications related to competency to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirements that the organization is obligated to meet.
- Privileges granted may be exercised only at the Hospitals that offer the service/specialty, have sufficient space, equipment, staffing, and other resources required to support the privilege.
- Requests for clinical privileges that are subject to an exclusive contract will not be processed except as consistent with the contract.

Evaluating Current Clinical Competence at time of Reappointment:

MLH Data will be obtained and analyzed as available from EMR reporting systems or Health Information Management.

If minimal activity/low volume, then the applicant should supply case logs from other facilities' HIM department or practice billing systems to meet the minimum requirement(s) to be considered for the privilege. Source of the logs must be denoted.

The preferable format for external case logs is Excel or PDF from the sourced system. Handwritten case logs are generally not accepted.

Case logs should include a blinded or partial patient number for case distinction, date of service, type of service (inpatient or outpatient), location of service, diagnostic code and/or procedure codes, and performing provider where applicable.

Privilege	Initial Application Required Education and/or Training	Initial Application Current Clinical Competence (CCC)	Reappointment Retrospective review of cases performed at MLH facility (FPPE)

Core Privileges

Endovascular Surgical Neuroradiology

Admit, evaluate, diagnose, treat, and provide consultation to patients of all ages with diseases of the CNS by use of catheter technology, radiologic imaging, and clinical expertise.

Physicians may provide care to patients in the intensive care setting in conformance with unit policies.

Access, stabilize and determine disposition of patients with emergent conditions consistent with the Medical Staff policy regarding

Privileges include but are not limited to:

- Angiography and embolization of spinal arteriovenous malformations
- Cavernous sinus sampling
- Catheter-directed intra-arterial stroke therapy
- Cerebral digital subtraction angiography
- Endovascular treatment of intracranial aneurysms
- Embolization of brain arteriovenous malformations
- Extra cranial endovascular procedures
- Extra cranial and intracranial angioplasty and stenting
- Integration of endovascular therapy into the clinical management of patients with neurological diseases (or diseases of the CNS) when performing diagnostic and therapeutic procedures
- Interpretation of catheter-based angiographic studies
- Intra-arterial thrombolysis and mechanical thrombectomy
- Intracranial/intra-arterial chemotherapy
- Intracranial stent placement
- Participation in short- and long-term post-procedure follow-up care, including neurointensive care
- Pre- and postoperative management of endovascular patients
- Provocative and occlusion tests
- Venous embolization of fistulae/thrombosis

Special Privileges

The physician requesting special privileges must meet the minimum criteria for the specialty core and demonstrate the appropriate post graduate training and/or demonstrate successful completion of an approved, recognized course when such exists, or other acceptable experience.

Administration of Moderate Sedation

See Credentialing Policy for Sedation and Analgesia by Non-Anesthesiologists.

Requires: Separate DOP, ACLS, NRP or PALS certification

Unified Medical Staff: Memphis Hospitals & Olive Branch Hospital
